**Summer Season** – Summer is one of the four seasons of the year. It starts from the month of April and ends by the month of June. It is hot during this season. The days are long and the nights are short. We have more sunshine and dry hot winds blowing during the day. Thus it is advised that we stay indoors during the day. We should also drink lots of water to stay cool during this season. During summers we love eating watery fruits like watermelon, muskmelon and mango. Not to miss our favourite ice-creams, cold juices and shakes. <https://youtu.be/whWEbyWLYSo>
